

Project Feedback

Hello, my name is **Mamidikuduru Rakesh**.

I successfully completed the project **AI-Driven Buyer Segmentation & Investment Behavior Analysis for Parcl Real Estate Platform**. During this project I learned how to clean and prepare real estate datasets in Microsoft Excel, create buyer segmentation variables, analyze customer financing behavior, and build interactive dashboards in Microsoft Power BI.

I also learned how to connect multiple datasets using a common key, create KPI measures, visualize investment patterns, and present business insights through a dashboard. Publishing the project through GitHub and Streamlit Cloud helped me understand basic project deployment and portfolio presentation.

This project improved my practical data analytics skills and increased my confidence in using Excel and Power BI for real estate and business analytics tasks. Overall, it was a valuable learning experience that strengthened my understanding of customer segmentation, investment analysis, and dashboard reporting.

Thank you.
